## Registration

Just go to the official homepage of HelpRealm and read the terms and conditions carefully. If you agree with them then click on the signup button. A window should appear:

A screenshot of the HelpRealm website's registration form. The form is titled "Sign up" and is centered on a dark background. It contains several input fields: "Your company name", "Your full name", "Your E-Mail address", "Password", "Confirm password", and a captcha field with the text "Captcha: 10 + 5 = ?". Below the captcha field, there is a line of text: "By registering to our service you agree automatically with our end-user license agreement." At the bottom of the form is a green "Sign up" button. The top of the page shows a navigation bar with links: "HelpRealm", "About", "FAQ", "Documentation", "Imprint", and "Terms and Conditions". There are also "Sign up" and "Login" buttons in the top right corner.

Enter your company name, your full name, your e-mail address, your password with confirmation and the captcha. Your account will then be created. After account creation you need to confirm your account with the specified e-mail address. After successfully confirming your account you will then be able to login into your workspace.

Go to system settings. You will find your workspace link there. This is the link you have to provide to your customers in order for them to create support requests.

## Customer view

The customer view is what your clients see. They can either see a form where to create or open tickets with and also a personal page showing ticket information and conversation. Also they can view the FAQ.

**Create new ticket**

Welcome to our support service. Please fill out the form in order to contact us. After submitting the form you will need to validate your e-mail address. A support agent will then process your request. You will get notification e-mails when an agent has replied to your ticket. Note: If you don't know which type of ticket you need to choose then leave it as default.

**Captcha: 10 + 0 = ?**

Note: You can attach files afterwards

ⓘ [Open ticket](#) | [Login as agent](#)

Communication between agents and customers can be processed by e-mail or a secret ticket thread form as seen below.

Hello dear

Before being able to manage a ticket by the owner customer, the customer needs to confirm their e-mail address after the ticket has been created. On successfull confirmation the customer can then post comments and upload files. The ticket will initially be set to „Awaiting confirmation“ and after successfull confirmation it will be set to „Open“.

The customer needs to held the link to the support conversation private. There they can communicate with the support staff and also exchange files. Whenever a customer replies to a ticket it will be set to status „open“. When a support agent replies it will set to „waiting“ which indicates that the staff is waiting for the customer to reply. When a ticket is closed by staff the customer can no longer reply or upload files to the ticket.

Customers will recieve e-mails for the associated events.

A customer can click „Open ticket“ and enter a ticket hash in order to view the ticket detail form. The ticket hash is the same as in the private ticket link.

The FAQ overlay looks as follows:

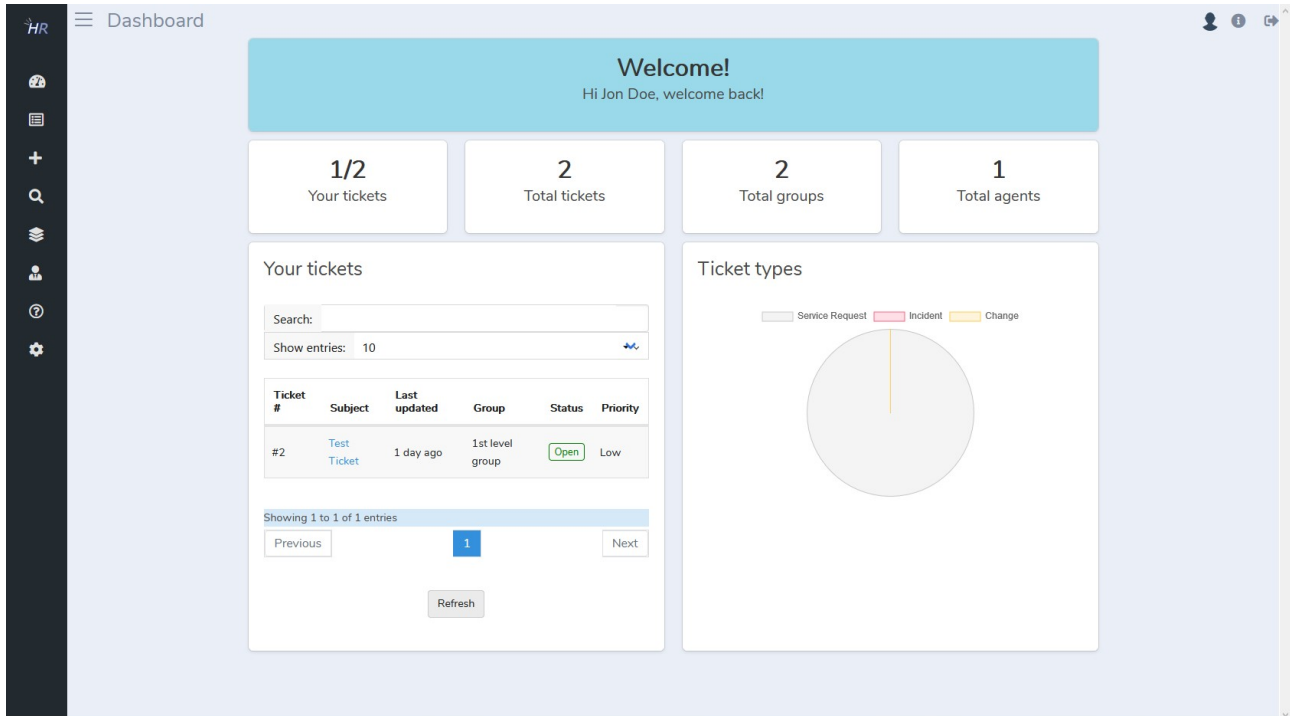

x

Welcome to our support service  
validate your e-mail address  
agent has replied to your ticket

# Dashboard

The dashboard shows you some general data. There you can view an overview of your tickets and general information about tickets.

On left side there a menu. It covers the following items:

- Dashboard: Opens the dashboard as seen above
- Ticket list: Opens a ticket list where you can see tickets of your groups and tickets that are assigned to you
- Ticket creation: Here you can create tickets for customers
- Ticket search: Shows a form where you can search for tickets
- Groups: Manage ticket groups here. Only available for superadmins
- Agents: Manage your agents here. Only available for superadmins
- System: Manage system settings here. Only available for superadmins

## Tickets

As an agent you can view your tickets and the tickets in the group you are in. Here you can see basic details of the tickets. Click a ticket in order to open it.

The screenshot shows the 'View tickets' interface. On the left is a dark sidebar with icons for HR, users, calendar, add, search, list, profile, help, and settings. The main area has a header 'View tickets' and a user profile icon. Below the header are two panels:

**Your tickets**

Search:   
Show entries: 10

| Ticket # | Subject                     | Last updated | Group           | Status            | Priority |
|----------|-----------------------------|--------------|-----------------|-------------------|----------|
| #2       | <a href="#">Test Ticket</a> | 1 day ago    | 1st level group | <span>Open</span> | Low      |

Nice work!

[Jon Doe](#) 1 day ago

Hello dear

[Edit](#)

Now you can add comments, manage the ticket data and add attachments.

The following ticket options exist (left to right):

- Assign ticket to agent. A window will open where you can select an agent
- Assign ticket to group. A window will open where you can select a group
- Set ticket status. Here you can set the status open, waiting and closed
- Set ticket priority. Here you can set it to low, medium or high
- Set ticket type. Here you can change it to one of the ticket types you have defined

Click the „Hash“ link in order to view the ticket hash. You can share it with the customer.

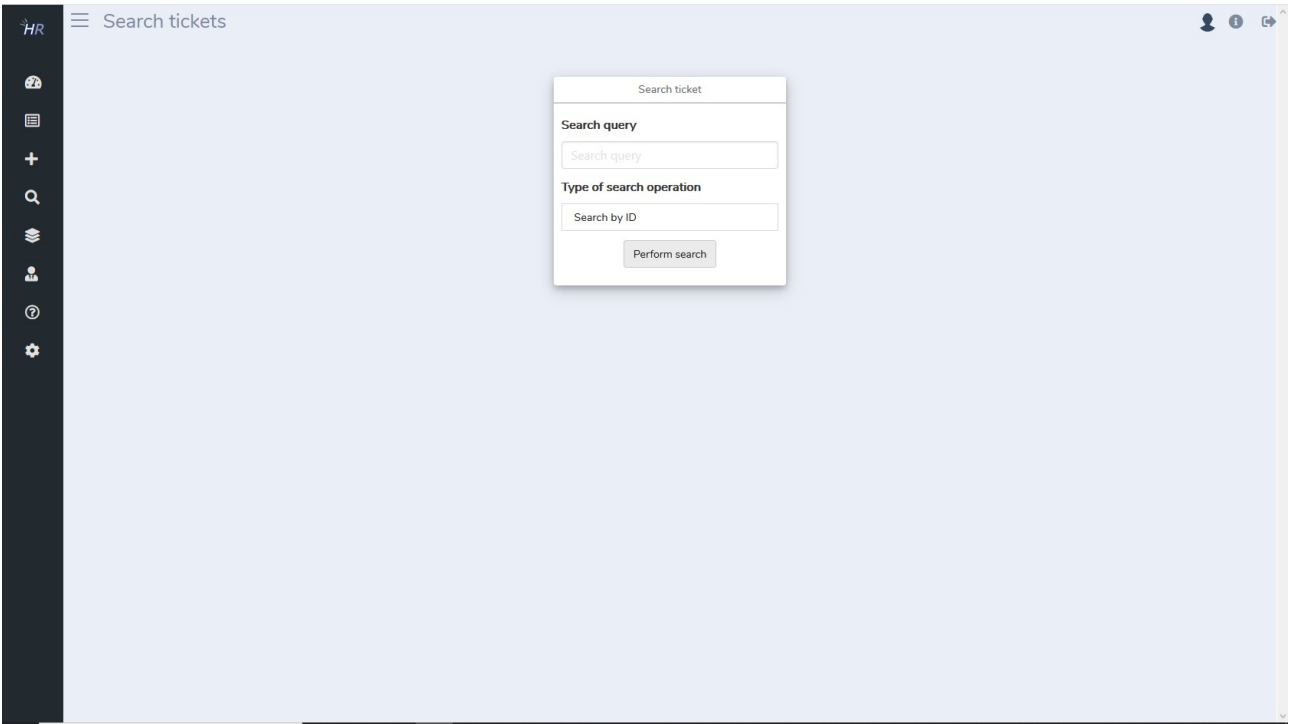

You can create tickets for customers. Therefore click on the „+“ icon:

All fields are mandatory. You don't need to specify an agent if you want to just have it in a group and let the agents decide who takes it.

Note: It is also possible to reply to ticket notification emails in order to post to the ticket thread. A customer replying to a notification email will also lead to confirming their email address.

You also can search for tickets by clicking the lense button. Tickets can be found by ID, hash, subject and description.

## Groups

Here you can view a list of all created groups. Click a group in order to edit the group details. Click „Create“ in order to create a new group.

The screenshot displays a web application interface for managing groups. On the left is a dark sidebar with icons for HR, a search icon, a plus sign, a magnifying glass, a list icon, a person icon, a question mark, and a gear. The main header area shows a hamburger menu icon and the text 'Groups'. In the top right corner, there are icons for a user profile, a help icon, and a share icon. The central content area is a modal window titled 'Groups'. It features a search input field, a 'Show entries' dropdown menu set to '10', and a table with the following data:

| ID | Name            | Description       | Default |
|----|-----------------|-------------------|---------|
| #2 | 1st level group | The primary group | true    |
| #4 | 2nd level group | dawfgawfgwaqgg    | false   |

Below the table, it says 'Showing 1 to 2 of 2 entries'. There are 'Previous' and 'Next' buttons for pagination, with the number '1' highlighted in the center. At the bottom of the modal, there are 'Refresh' and 'Create' buttons.

On group details view you can edit the group and also assign and remove agents

- Click on the „Add to group“ button to add an agent. A window with a list of agents will open
- Click the „Remove“ link in order to remove an agent from the group

The screenshot displays the 'View group' interface. On the left, a sidebar contains navigation icons. The main area is titled 'View group' and contains two panels. The left panel, titled 'View group', has fields for 'Name' (containing '1st level group') and 'Description' (containing 'The primary group'). Below these is a 'Default' section with a checked checkbox 'Set this group as default' and 'Save' and 'Delete' buttons. The right panel, titled 'Agents', has a search bar, a 'Show entries: 10' dropdown, and a table with columns 'ID', 'Surname Lastname', and 'Remove'. The table contains one entry: ID #2, Surname Lastname 'Jon Doe', and a 'Remove' link. Below the table is a pagination bar showing 'Showing 1 to 1 of 1 entries' with 'Prev', '1', and 'Next' buttons. At the bottom of the panel are 'Refresh' and 'Add to group' buttons.

Back to the group list view, you can click „Create“ button to open a form where you can create a new group.

The screenshot displays the 'Create new group' form. The form is titled 'Create new group' and has fields for 'Name' (containing 'Name') and 'Description' (containing 'Description'). Below these is a 'Default' section with an unchecked checkbox 'Set this group as default' and a 'Create' button.

Note: Default group means that newly created tickets will be automatically inserted into the group. Only one group can be set as default. Setting multiple groups to default will be ignored.

## Agents

Here you can view all your agents. You can click an agent in order to edit their details and assign groups. Also you can add new agents and delete existing ones. Be careful when granting superadmin rights. You should only give that permission to team members you are in that position of your company.

The screenshot shows the 'Agents' management interface. It features a sidebar with navigation icons and a main content area. The main area contains a search bar, a 'Show entries' dropdown set to 10, and a table with one agent entry. Below the table is a pagination bar showing 'Showing 1 to 1 of 1 entries' and buttons for 'Previous', '1', and 'Next'. At the bottom are 'Refresh' and 'Create' buttons.

| ID | Name    | E-Mail         | Position      |
|----|---------|----------------|---------------|
| #2 | Jon Doe | joedoe@test.de | Administrator |

The screenshot shows the 'Create agent' form. It includes input fields for Surname, Lastname, E-Mail, Position, Password, and Password confirmation. There is also a checkbox for 'Set as superadmin' and a 'Create' button at the bottom.

## FAQ

You can manage frequently asked questions here. FAQs can be used to provide answers to common questions so a customer doesn't need to create a ticket for any simple problem. Click the question mark item to view the list of FAQs.

Click the create button to create a new FAQ.

In the FAQ list you can click on an item in order to edit it.

## System settings

Here you can manage system settings and view the documentation. You can set the company name, the global language (used for your customer views), the ticket form welcome message, ticket types and background mode. Global language is overridden by personal language that can be set by agents of their own profile (see settings section). Also you can define whether customers have to confirm their e-mail addresses during ticket creation process.

System settings

Your workspace link: <http://localhost:8000/0b392c21569ec31b5ccad8a3a134632>

Ticket types

Search:

Show entries: 10

The ticket types should define the types of ticket that are suitable for your business. Commonly there are types such as Service Request, Incident and Change.

Regarding the background mode you can specify whether background images or a plain background color shall be used in the customer views. And also you can upload new background images or delete existing ones.

There is also a danger zone where you can cancel your workspace. This will result in erasing all your workspace data and cannot be undone.

## Profile Settings

You can edit your own settings in the settings menu. There you can edit your personal settings, change your password, upload an avatar and change your language.

The screenshot displays a web application interface for profile settings. On the left is a dark sidebar with icons for HR, a calendar, a plus sign, a magnifying glass, a stack of papers, a person icon, a question mark, and a gear. The main content area has a light blue background and is titled 'Settings' in the top left. It contains three white panels with rounded corners and shadows.

**Settings Panel:**

- Surname:** A text input field containing 'Jon'.
- Lastname:** A text input field containing 'Doe'.
- E-Mail address:** A text input field containing 'joedoe@test.de'.
- ☒ Send me an E-Mail when a ticket is routed into my groups
- Password:** A text input field.
- Password confirmation:** A text input field.
- Save:** A button at the bottom right.

**Avatar Panel:**

- Avatar:** A text input field with a 'Select a file' button to its right.
- Save:** A button at the bottom.

**Language Panel:**

- Language:** A text input field containing 'en'.
- Save:** A button at the bottom.

## API Endpoint

In case you want to create a ticket programmatically, you can use the API.

In order to create a ticket, use the following URL: / api / { workspace } / ticket / create  
Request method is POST. { workspace } is your workspace name hash.

The following post data is expected:

| Field      | Description                        | Requirements  |
|------------|------------------------------------|---|
| subject    | The subject of the ticket          | Required, minimum 5 chars                                       |
| text       | The ticket text                    | Required, maximum 4096 chars                                    |
| name       | The name of the customer           | Required  |
| email      | The e-mail address of the customer | Required  |
| type       | Ticket type                        | Required, must match the ID of one of your created ticket types |
| prio       | Ticket priority                    | Required, 1 = low, 2 = medium, 3 = high                         |
| attachment | A file to be attached              | Optional  |

The API endpoint will return a JSON response whose content depends on the operation result. Each response holds a ,code' field which holds the HTTP status code of the operation as well as the workspace hash name.

The following response codes are possible:

| <b>Value</b>                     | <b>Description</b>  | <b>Additional data</b>  |
|----------------------------------|---|---|
| 404 <i>Not Found</i>             | <ul style="list-style-type: none"><li>- The workspace could not be found</li><li>- The specified ticket type could not be found</li></ul> | <ul style="list-style-type: none"><li>- No workspace found: none</li><li>- Ticket type not found: field <code>,ticket_type'</code> with the request value</li></ul>   |
| 500 <i>Internal Server Error</i> | <ul style="list-style-type: none"><li>- The post data is invalid</li><li>- The ticket could not be created</li></ul>                      | <ul style="list-style-type: none"><li>- Invalid post data: field <code>,invalid_fields'</code> as an array containing an array for each failed post data item with the fields <code>,name'</code> for the field name and <code>,value'</code> for the failed value</li><li>- Ticket not created: A field <code>,data'</code> with the data that could not be stored</li></ul> |
| 429 <i>Too Many Requests</i>     | You tried to create too many tickets in a period of time  | Field <code>,ticket_wait_time'</code> that holds the time in seconds you have to wait until you may create a ticket again   |
| 201 <i>Created</i>               | The ticket has been created   | Field <code>,data'</code> containing the stored ticket data   |
